

Superior work aids for the woodworkers, Great Neck planes are outstanding products. Flawless workmanship and quality materials used in the construction of every tool are enhanced by the special handsome Great Neck finishes. Cutters are made from high quality durable special chrome alloy tool steel. All parts are polished and plated, and hardwood handles and knobs are highly finished.

GM-O MODEL MAKERS PLANE

Miniature plane for model makers, cabinet makers, and for other detailing of fine wood-working. Alloy tool steel cutter is end-adjustable with nickel plated adjusting screw.

G-1 BLOCK PLANE

Adjustable mouth, with end and side screw adjustment. Allows rapid, exact regulation from coarse to fine work. Bottom and sides are smoothly milled and polished. Japan finish. Brass adjusting wheel.

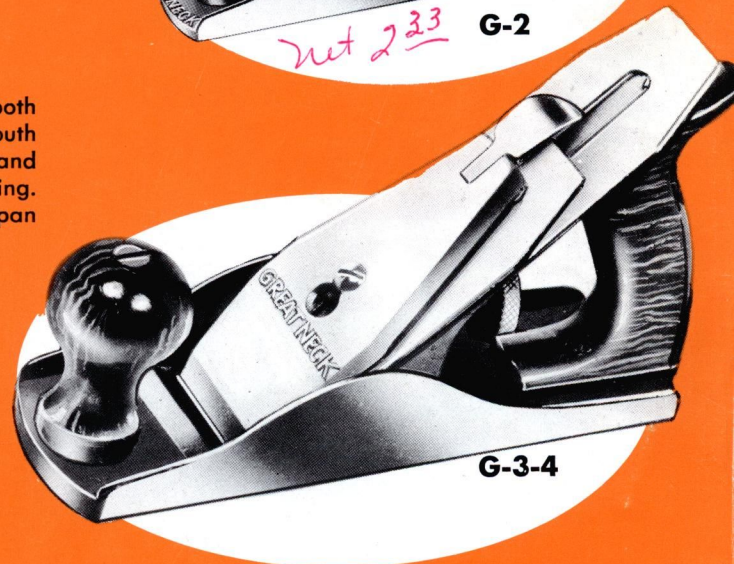

G-2 BLOCK PLANE

Popular type plane for everyday work not requiring frequent adjustment. Steel screw makes cutter adjustable for thickness of cut. Bottom and sides milled and polished. Japan finish.

G-3 BENCH PLANE — G-4 BENCH PLANE

Also called smooth planes. Available in 8" and 9" sizes with smooth or corrugated bottoms. Fully adjustable to meet all requirements. Mouth can be widened or closed for coarse to fine work as desired. End and side adjustments of cutters allow for thickness and evenness of planing. Bottom and sides milled and polished. Brass adjusting wheel. Japan finish.

No.	Type	Length	Cutter	Weight

Great Neck PLANES

PRECISION WORKMANSHIP IN THE CONSTRUCTION OF GREAT NECK PLANES

CUTTERS:

Each a solid piece of fine chrome alloy steel, fully tempered, ground and honed to a quality finish. Special design eliminates chatter, gives a constant cut.

FROG:

Sturdily constructed to provide firm support at rear of mouth, making each tool a tight, vibration-proof unit. Adjustable for width of mouth.

ADJUSTMENTS:

Made to the finest specifications in tool technology, permitting reliable precision settings in a few seconds.

LEVER CAP:

Lustrously chrome plated. Designed to hold the cutter securely to prevent chatter.

KNOBS AND HANDLES:

Made of specially treated hardwoods, with attractive life-time finish. Handles are specially shaped to give an easy natural grip that prevents slipping. Knobs securely fitted into plane bottom, avoiding looseness and splitting.

ASSEMBLY PARTS:

Made of the finest quality carbon steel for maximum work efficiency. Each part is hardened and tempered by the finest tool making equipment for excellent results and long life.

G-5

G-6

RP-8

G-5 JACK PLANE

Suitable for the roughest work required, sturdily constructed to do a man-sized job efficiently, quickly. Screw adjustment permits quick regulation to different cuts. Bottom and sides milled and polished. Japan finish. Smooth or corrugated bottoms.

G-6 FORE PLANE

A work-wise plane for finishing uneven surfaces or for dressing edges to a flush fit before joining or glueing. End and side adjustments. Bottom and sides smoothly milled and polished. Japan finish. Smooth or corrugated bottoms.

RP-8 DUPLEX RABBET PLANE & FILLETSTER

This plane has two seats for the cutter; one for regular work, the other for bullnose work. Adjustable fence can be used on either side of the plane and slides under the bottom for regulating width of cut. Depth gauge regulates depth of cut. For use with or across grain. Bottom and edges are milled and ground smooth. Body is japanned black, and all parts are rustproof plated. Blade is of special chrome alloy tool steel. Handle is cast with body in one piece.

GREAT NECK

C-0 BLOCK PLANE C-1 BLOCK PLANE

A small bodied, compact plane which does not require frequent adjustment. Especially handy for light work. Alloy tool steel cutter is hardened and tempered, ground to a razor-sharp edge. Bottom is smoothly milled and polished. Baked black japan finish.

C-2 BLOCK PLANE

A popular block plane for easy control with one hand does not require frequent adjustment. Alloy tool steel cutter is hardened and tempered, ground to a razor-sharp edge. Both bottom and sides are smoothly milled and polished. Baked black japan finish.

W-4 FOUR-WAY 9" SMOOTH PLANE WITH LONG-SERVICE FOUR-EDGE DISPOSABLE BLADE

Newest sensation from Great Neck Tools—the Four-Way plane with "metal-magic" four-edge disposable blade! Utilizing latest revolutionary metallurgical techniques, this ultra-sharp hardened steel blade has four long-service cutting edges—no need to ever attempt to sharpen a blade again—when cutting edges wear dull, just throw away blade and replace! Extra light in weight, because of fewer parts, the W-4 plane is not fatiguing to use. Sturdy cast-iron body is precision milled and polished on sides and bottom, with baked enamel finish on inside surfaces. Cap is bright nickel plated. Lock screw and adjusting nut are solid brass. Handles are mahogany-colored kiln-dried hardwood.

C-3 SMOOTH PLANE

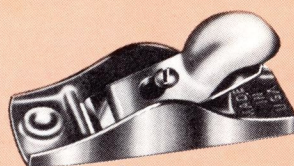

C-4 SMOOTH PLANE C-5 JACK PLANE

Top value planes, Great Neck Corsair C-4 and C-5 have alloy tool steel cutters that are hardened and tempered and ground to a razor-sharp edge. C-4 Smooth Plane and C-5 Jack Plane feature a newly improved lever cap—a radically engineered honeycomb die-casting of rust-proof metal with mirror-bright chrome plated finish—reduces weight and adds longer life. Bottom and sides are smoothly and accurately machined and polished. Frog is adjustable to width of mouth, is rigidly constructed and vibration-proof. Knobs and handles are made of genuine kiln-dried hardwood, attractive mahogany finished. Assembly parts are made of high quality, hardened and tempered alloy tool steel. Brass adjusting screw. These planes are rigid, vibration-free top efficiency tools of superior quality. Special design eliminates chatter, gives a consistent cut.

COMBINATION SQUARE

Corsair combination squares can be used as a try square, mitre square, depth or marking gauge, or as a plumb or a level. They are manufactured by the most advanced methods — precision casting, **super-accurate machining**. Beautifully finished, **rust-proofed plated blades** are 12" long and 1" wide and are accurately graduated in 8ths and 16ths on one side, 16ths and 32nds on the other side. The blade is grooved end-to-end so that the handle may be moved and locked at any point by brass adjusting screw with enclosed spring. The **precision-set level vial in the handle** can be used as a level or as a plumb. Hardened steel scriber with brass grip is set in handle.

Stock No.	Packed	Units per Carton	Weight per Carton
CS-12	1 in a box	72	50 lbs.
CS-12B	1 in poly bag	50	40 lbs.

MACHINISTS' COMBINATION SQUARE WITH CENTER HEAD

Accurately die-cast center head quickly determines the center of bar and rod stock. Invaluable time saver for all lathe workers, both metal and wood. All other specifications of combination square same as CS-12.

Stock No.	Packed	Units per Carton	Weight per Carton
CE-12	1 in a box	72	68 lbs.
CE-12B	1 in poly bag	50	52 lbs.

CH	Center head	6	1½ lbs.

TRY-MITRE SQUARE

A sturdy, firm tool, attractively constructed for high volume sales. The handle is precision cast and **machined**, then finished in rich, black baked-on enamel. **Precision set level vial is mounted in the handle**. The blade is highly plated and has a convenient hanghole. Three nickel-plated rivets, scientifically placed in handle, make this square one of the most rigid, accurate tools to work with.

No. TS-8 TRY-MITRE SQUARE

Individually packed in colorful boxes, 72 to a shipping carton. Shipping weight 40 lbs.

No. TS-8B TRY-MITRE SQUARE

Individually packed in clear Poly-Pouch Pack, 50 to a shipping carton. Shipping weight 28 lbs.

SLIDING T-BEVEL

Here is a classic tool, favored by the highly skilled cabinet maker, carpenter and home craftsman alike, newly redesigned to incorporate the most modern materials and manufacturing methods. The handle, which is perfectly square in any position, is made of a special unbreakable lustrous black plastic, true and accurately shaped. The blade, 8" long and 1" wide, is polished and plated rustproof. The special single-wing adjusting nut is solid bronze.

No. BS-8 SLIDING T-BEVEL

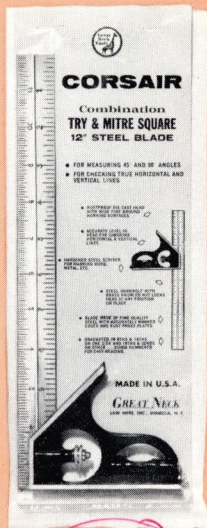

Packed individually in attractive boxes, 12 boxes in a counter display, 72 in a shipping carton. Shipping weight is 35 lbs.

No. BS-8B SLIDING T-BEVEL

Individually packed in heavy poly bags with headers, for colorful display. 72 to a shipping carton. Shipping weight 40 lbs.

CHROME VANADIUM SCREW DRIVERS

The finest line ever made! These screwdrivers are manufactured to the most exacting specifications to give longer life and better service than any others. Blades are made from **high grade chrome vanadium steel**, hardened and tempered their entire length, polished and precision cross-ground to exact size. Especially designed **extruded plastic handles** are crystal-clear, with blue trim, perfectly balanced and deeply fluted for sure grip. Handles are machined smooth and true. The high-impact plastic is unbreakable, slip-proof, shock-proof, will not splinter or warp, and cannot absorb grease or oils.

SAW MANUFACTURERS, INC.
MINEOLA, NEW YORK

SPIRAL RATCHET AUTOMATIC SCREW DRIVERS

The finest quality spiral ratchet screwdrivers made! All metal parts are perfectly machined to exact size and heavily plated to prevent rusting. Spring-loaded chuck holds blades firmly, quickly releases them for changes. Three position ratchet control is easily operated with fingertip shift for driving or removing screws, or locked as standard ratchet screwdriver. All models have automatic spring return which brings shaft back to drive position after each stroke and holds bit firmly in screw slot for one-hand operation. Hardwood handles are smoothly plastic covered for blister-free grip. Made in England.

No. 77A "HANDY"

Needed in every tool box! 9 3/4" overall, with 2" stroke. Furnished with 1/4" bit. Individually boxed. Weight 1/2 lb. each.

No. 97A "COMBO"

Really handy! 10" overall length. Five different bits stored in hollow clear plastic handle. 3/16" and 1/4" screwdriver bits; 1/16", 3/32" and 1/8" drill bits. Individually boxed. Weight 3/4 lb. each.

No. 177A "CABINET"

For precision cabinet work and light screw driving. 13 3/4" overall, with 3" stroke. With 3 alloy tool steel bits—3/32", 1/16", 3/32". Individually boxed. Weight 1 lb. each.

No. 277A "STANDARD"

Craftsman's favorite! 20" overall with bit, 5" stroke. Furnished with 3 bits, 3/32", 1/4" and 3/8" drivers. Individually boxed. Weight 1 1/4 lbs. each.

No. 377A "HEAVY DUTY"

Big enough for any job! 27 3/4" overall, with 8 1/4" stroke. Furnished with 3 bits—1/4", 3/8", and 3/4". Individually boxed. Weight 1 3/4 lbs. each.

No. SR-6A TOOLRACK

Colorful display rack for pegboard fixtures sells 3 each No. 77A and No. 97A spiral ratchet automatic screwdrivers. Weight 4 lbs.

ACCESSORY KITS

Accessory kits of additional bits to complement the usefulness of spiral ratchet drivers. These bits fit Nos. 77A, 97A and 177A drivers, and most other makes of similar size drivers. All are in permanent plastic pouches.

No. W-1 DRILL POINTS

3 drill points, 1 each 3/64", 1/64", 1/64". 6 kits in a box, weight 1/2 lb.

No. W-2 RECESS DRIVERS

2 recess point screw drivers, #1 point and #2 point. 6 kits in a box, weight 1/2 lb.

No. W-3 KEYSTONE BITS

2 keystone bits for slotted screws, 3/32", and 1/4". 6 kits in a box, weight 1/2 lb.

No. W-5 COMBINATION KIT

5 bits: 1 each 3/32" keystone screwdriver bit; 3/64", 1/64", 1/64" drill points; 3/16" countersink. 6 kits in a box, weight 3/4 lb.

No. W-12A TOOLRACK

A bright seller! Compact rack sells 12 kits, 3 each of above numbers, W-1, W-2, W-3 and W-5. Weight per display, 3 lbs.

AUTOMATIC PUSH DRILLS

No. 104D automatic push drill is crafted to highest standards of excellence. Non-slip drive mechanism. All exposed metal parts are heavy chrome plated. Handle is clear plastic, stores 4 drill bits, sizes 3/64", 1/64", 1/64" and 1/8" furnished. Quick-change chuck holds drills firmly. Packed 1 in a box. Weight 1/2 lb.

RATCHET SCREW DRIVERS

Great Neck "Sheffield" ratchet screwdrivers make quick work of small jobs, relieve wrist fatigue and increase turning power. Non-slip three position ratchet control with fingertip shift for driving or removing screws, or locked as plain driver. Handles are made of clear amber-colored plastic, unbreakable and shockproof, and unaffected by greases or oils.
